ABOUT EDSA

*DO THESE QUESTIONS RELATE TO YOU?
ARE YOU TIRED OF THE EMBARRASSMENT?
DO YOU WANT TO REGAIN YOUR
CONFIDENCE BACK IN THE BEDROOM AND
SATISFY YOUR PARTNER?*

You shouldn't have to live with the struggle of Erectile Dysfunction (ED). Here at EDSAustralia, we understand men and the impact impotence of erectile dysfunction is having on relationships and everyday life. This common and growing problem facing men causes physical and emotional distress in at least 1 in 5 men over the age of 40 years.

Many men are not provided with all the options and best solutions to treat the problem, but here at EDSAustralia, Dr Elmes has conducted extensive research in finding the best and safest treatments available to ensure men are provided all options to treat their erectile dysfunction.

Dr Elmes has looked after and patched up patients who have tried injections and not been warned of the serious potential side effects. EDSAustralia will provide you with great products and state of the art service and treatment. Don't let erectile dysfunction take over your life! We will take you from zero to hero with no lock in contracts but all options on the table for your satisfaction.

WHY SHOULD I CONTACT EDSA?

The benefits of treating your erectile dysfunction with the help of EDSAustralia will see you regain your confidence back in the bedroom and relieve the anxiety and stress you may have been feeling as a result of your erectile problems. Other benefits you will experience include:

- Enhanced self-esteem
- The ability to reconnect with your partner
- Feeling like more of a man
- Sexual arousal and pleasure you have been missing in your relationship

TREATMENTS OFFERED BY EDSA

EDSAustralia provides the complete package and service for super-specialised tailored erectile rehabilitation. The treatments we provide:

- RAPID acting super strength Viagra
- Hidden needle injection
- Penile Prosthesis/graft surgery

RAPID ACTING VIAGRA

RAPID is an oral administration lozenge containing a combination of sildenafil and phentolamine for a more effective treatment of mild ED. This non-invasive option is commonly used for first stage of treatment. The lozenge simply dissolves under your tongue and the medication becomes active 5-10 minutes later. RAPID is recommended as first stage use to treat ED.

NEEDLE AND HIDDEN NEEDLE INJECTION

Intracavernosal injections provide an effective therapy for men with erectile dysfunction who cannot take oral agents or for whom oral agents are not effective.

The advantage of injection therapy is that it does not depend on oral absorption, as pills do, and does not depend on absorption through the tissues. Either **needle injectable** or a more comfortable option of **hidden needle** is available through EDSAustralia. More information is provided on the Hidden Needle delivery system brochure provided by Dr Elmes' rooms.

PENILE PROSTHESIS

For men who have erectile dysfunction resistant to oral medications, Penile Prosthesis allows a permanent solution to this debilitating and often psychologically distressing condition. Studies indicate 93.8% of men were moderately or completely satisfied with their penile prosthesis choice. Dr Elmes implants both major types of penile prosthesis, **AMS & Coloplast**. The choice of implant is primarily dependant on each patient's anatomy.

Dr Elmes only uses state of the art prostheses, which produce a more natural erection, maximised girth and rigidity, confident operation, easy one-handed deflation and minimal recovery time.
